

Snippets of Shell code.

Show every second line of a file

```
awk 'NR % 2 == 0' filename
```

```
<bash iperftests.sh> for server in `cat server.list` do echo -e "Server: "$server ssh -T $server "iperf3  
-s -D"; for client in `cat server.list`
```

```
do  
  echo -e "Client: "$client  
  ssh -T $client <<EOF  
  iperf3 -c $server -n 50G -P 2 | tail -9
```

```
EOF
```

```
done  
ssh -T $server "pkill iperf3";
```

```
done <bash>
```
