Snippets of Shell code.

Show every second line of a file

```
awk 'NR % 2 == 0' filename
```

<bash iperftests.sh> for server in `cat server.list` do echo -e "Server: "$server ssh -T $server "iperf3 -s -D"; for client in `cat server.list`

```
do
 echo -e "Client: "$client
 ssh -T $client <<EOF
  iperf3 -c $server -n 50G -P 2 | tail -9
```

EOF

```
done
ssh -T $server "pkill iperf3";
```

done <bash>
