Snippets of Shell code.

Show every second line of a file

```
awk 'NR % 2 == 0' filename
```

iperftests.sh

```
for server in `cat server.list`
do
 echo -e "Server: "$server
 ssh -T $server "iperf3 -s -D";
 for client in `cat server.list`
   do
    echo -e "Client: "$client
    ssh -T $client <<EOF
     iperf3 -c $server -n 50G -P 2 | tail -9
EOF
   done
  ssh -T $server "pkill iperf3";
done
```
