rebuild initrd for all installed kernels

```
rpm -qa | grep kernel | grep -v headers | grep -v tools | sed 's/^kernel\-
//g' | xargs -i dracut -v -f /boot/initramfs-{}.img {}
```

rsync directories or partitions in backup or restore

```
rsync -avP --numeric-ids --exclude='/dev' --exclude='/proc' --exclude='/sys'
root@remote.ip.address:/remote/file/location /local/backup/destination/
```

generate grub2 efi config for installed kernels

```
grub2-mkconfig -o /boot/efi/EFI/redhat/grub.cfg
```

device file mounts in recovery mode

<code bash> mount –bind /dev /mnt/dev mount –bind /dev/pts /mnt/dev/pts mount –bind /proc /mnt/proc mount –bind /sys /mnt/sys </bash>
